DUCO[®]
VENTILATION & SUN CONTROL

DucoSlide

Architectural Sun Control

DucoSlide (6 types) are external Sun Control systems with aluminium sliding panels which reduces the Solar Heat Gain and Solar Glare whilst optimising daylight entry. DucoSlide results in more privacy because a glass façade is shielded but provides nevertheless for an uninterrupted outside view. Combined with natural ventilation DucoSlide helps to provide a healthy, comfortable and energy efficient indoor climate.

DucoSlide is an architectural system which can be guided in different ways. It is specifically designed to apply the sliding panels with different guiding systems in the same façade without disrupting its sight. The panels are quick and easy to assemble with a minimum of tools.

Technical Specifications

DucoSlide	60 F Slimframe	60 F Luxframe	50Z /30° Slimframe NEW !	50Z /30°Luxframe NEW !	100 D Slimframe	Ellips 100 Slimframe NEW !
